- Nest JS
- React JS
- Angular
- MySQL
- PostrgeSQL
- MongoDB
- Test Driven Development
- AWS EC2
- Docker
- Nginx
- Tailwind CSS
- Material UI
- SASS
- Data Structures and algorithims

WORK EXPERIENCE

Urban Hive Ltd - Full Stack Developer **November 2021 - Current**

• Lead a team of 3 developers to create a (react/node js) online learning web/mobile app for students in Guinea, complete with an admin module for updating courses. This app recieves 100 weekly users and gives education access to those who cannot pay traditional tuition.

• Planned database structure,and hosted on firebase, before using mongo DB. Created 'add to cart' feature and a payment gateway using mtn's api. Was responsible for reviewing code from others before merging into main github branch.
• Used redux to monitor global state, which in this case was the media file in focus, and stopped all other files when media was clicked. Introduced a testing approach that improved code confidence within my team.

• Introduced a download feature for media files, with the help of an in-browser database, for offline use.

Resident Care Homes Ltd – PHP/MYSQLSoftware Developer - September 2025 – Current (Contract)

• Implemented an automated compliance workflow that sends scheduled email alerts to care homes when residents' risk assessments or care plans require updates—significantly reducing missed deadlines and improving operational consistency across all active homes. - **www.residentcarehub.com**

• Built and deployed a comprehensive medicines and prescriptions module that gives carers real-time visibility into daily medication activity (administered, missed, withheld). Each record captures clinical details—dosage frequency, prescribing doctor, allergy checks, and staff signatures—resulting in safer medication management and improved audit readiness for 10+ care homes.

Bridgeway Microfinance Bank – Software Developer **July 2020 -November 2021**

• Spearheaded development of a marketplace application, translating user requirements to functional features in the app. This increased the customer base by 100 ,new clients reporting that they wanted to be a part of this discounted marketplace

• Suggested and Implemented additional features(e.g chat system) to improve user experience.Introduced a key formula into the app's logic which accurately distributed profits and discounts between the bank and its customers. https://bridge-way.netlify.app/
